PolyGard[®] Phosphine PH₃ Transmitter ADT53 1187

DESCRIPTION

Phosphine transmitter including digital measurement value processing and temperature compensation for the continuous monitoring of the ambient air to detect phosphine (PH₃) concentrations. Integrated in the transmitter there is a comfortable calibration routine with selective access release. The ADT-53 possesses a standard analog output (0) 4- 20 mA or (0) 2– 10 V DC, and an RS-485 interface. 2 relays with adjustable switching thresholds are available as an option.

APPLICATION

For the detection of phosphine within a wide range of industrial and commercial applications. Due to the standard output signal and the RS-485 interface the phosphine transmitter is compatible to the PolyGard Gas Controller series by MSR-E as well as to any other electronic control or automation system.
